If you are looking for some Design my room tips and cheats to help you get more positive votes for your design and get enough money and diamonds to afford all the best items and decorations in the game, you are in the right place! Because today we're helping you become a constant designer in the game. My room design is the latest in a series of games that helps you become a virtual designer and does an excellent job offering high quality graphics and a truly active community. The game is fun to play and the more active you are, the more rewarding it gets. But you can still get better - so check out our Design my room cheats and tips below and have fun becoming a world famous designer! Complete daily missions If you need more money and diamonds quickly, the easiest way to get them even if you don't score big points on design challenges is to complete your daily tasks. You need to complete them all every day or get as close as possible in order to unlock the treasure chests and grab the rewards. The hardest thing - especially when you're just booting - is what requires you to use 65 items in your plans, but failing in that every other day is even better than nothing. Eventually, you will have enough items unlocked by various means and will not be so close to complete this mission daily. You don't have to use all the possible elements in a plan that I've seen a lot of designs with very poor scores just because those who created them decided to fill all the available points. This is usually a mistake and even more so when you don't have that perfect component to install the design. Instead of using something that upsets the balance - or using something just to add an extra item to a room - it's best not to use anything at all. In most designs I usually leave at least two points that are not filled with items and I still manage to score at least A- on them! Unlock the story with badges As you play the game, unlock signals that can be used to unlock new episodes in the game's main story. This is done through the main menu and you can skip the stories entirely since they are text and image only and you don't have to play through them. But you need to unlock them, however, because once you get to a certain number of unlocked episodes, you are rewarded with a gift holding extremely useful goodies for your career as a virtual designer. So if you're not really interested in following the real story and adventures of the main character, you can simply accumulate signals until you have enough to unlock a gift, then use them one after the other, bypassing the actual story. It's your choice! Make special challenges first Every day, there are some special design challenges that will reward you with better rewards than normal. There's even an opportunity to see, if you scroll down the available challenges, which special ones will follow and then. Make sure you take part in as many special challenges as possible, because the rewards there are great and much better than those in normal. Vote for other plans and learn from them First of all, don't forget to vote for as many plans as possible. It's the community and votes of fellow players who make or break a game like Design My Room, so be sure to do your part here. And don't hesitate to excuse when it comes to ratings and offer more likes than dislikes. You also have a lot to learn from this: look at the designs you vote for, check out the items used, the colors and how everything is placed in the room. Then consider the considerations that the particular room design got and learn from it: if the ratings are overwhelmingly positive, you should try and replicate such designs. If it's mostly negative, make sure you don't repeat the mistakes the designer made. Be selective when for challenges You will do better or worse in a challenge depending on what items you have at hand. Each room type goes best with a specific type of item, while some of the items are only available for specific rooms. Try to focus and specialize early in order to increase your chances of getting high ratings. Designing my room is a waiting game and you have to be patient: you will have, sooner rather than later, enough items to do well in multiple categories, but initially you have to be in a couple. Remember that usually the rarest, most expensive items get better scores in the game (for the right reason, since they are usually better looking) and you won't be able to get them all once you start playing! That would be what we have for you today in terms of designing my room tips and tricks. Do you have other strategies to share with fellow players? If you do - let us all know by posting your comments below! Following!
